

SAFETY AND VIGILANCE MIRRORS

SAFETY AND VIGILANCE MIRRORS

TECHNICAL SPECIFICATION

Located within strategic points, helps minimizing possible accidents arising from a lack of visibility. Appropriated to the vigilance of angles or impasses within stores and supermarkets, and the road safety within crossroads and dangerous curves, parking exits and urban spaces with little visibility.

Resistant to corrosion and impact.

Excellent optical quality.

Can be fastened to a wall or a support.

Includes anchoring pieces.
